

DRYING SYSTEM DS 12-7,5

Description:

This drying machine dries filled and closed packages after washing or sterilization. The containers arrive by a conveyor belt at the drying section, where they are dried with air knives. There's one central blower to which several air knives can be connected for optimal drying. The machine is standard supplied with a conveyor belt.

Film: [LVS Drying and Labeling Line - YouTube](#)

Advantages:

This very stable and robust machine is extremely user friendly and easily accessible for adjustment, maintenance and cleaning.

Easy to adjust to different types or sizes of containers.

Option:

Can be combined with our FCW washing machine.
