

**SEMI-AUTOMATIC 1 HEAD FILLING MACHINE PN1-1000-BR**

**Description:**

This machine is intended for semi-automatic packaging filling. The product is sucked up via a hose and then pressed into the packaging via a filling cylinder with Viton cuffs. Operation by pneumatic foot pedal. Machine is supplied as standard with one adjustable filling head for one container size according to customer specifications.

**Advantages:**

Simple, maintenance-friendly machine made of stainless steel.  
Controls are completely pneumatic.  
Filling volume is adjustable by means of an adjusting screw.  
Including plastic drip tray under the filling position.

**Options:**

Format-dependent filling heads.  
Base  
Machine can also be integrated into an automatic line with adjustments
